

Ground Gas Awareness Workshop

Following on from Shawcity's popular PID (Photo Ionisation Awareness Workshops the new Ground Gas Awareness Workshop is designed to give a greater awareness of current practices and measuring instruments used.

The workshop takes the form of a PowerPoint presentation with the opportunity to get some hands on with some of the instrumentation available.

The presentation format is as follows:-

Introduction - who are Shawcity and what do we do ?

WHAT are we measuring ?

WHY are we measuring ?

WHICH parameters are measured? – Current Legislation & Guidance

HOW do we measure ? - the Use and Best Practice of:-

- Multi Gas, Pressure & Flow Analysers
- Flow Meters
- FIDs for measuring total hydrocarbons
- PIDs for trace component and VOC monitoring
- Monitors for Personal Safety on site

THE FUTURE - In-Borehole Gas Monitor

QUESTION & ANSWER SESSION

To take the opportunity to experience one of the workshops on your premises please complete the request form here http://www.shawcity.co.uk/contact_us.html with GROUND GAS WORKSHOP in the subject box
